This summer: E-Immersion Week
(see below for more information)

Upcoming Events

August 7-12, 2011
Entrepreneurship Immersion Week:

Entrepreneurship Immersion Week (EIW) is an amazing opportunity for students to gain valuable, first-hand experience while expanding their perspective of the business world…all free of charge!

This year’s EIW will be held at Ashland University in Ashland, Ohio, on August 7-12, 2011. During this intensive, week-long Entrepreneurship Academy, students will participate in academic sessions, networking opportunities, and the creation of a business concept as part of the competition. Judged by an outside panel of entrepreneurs and investors, the groups of students with the best business concepts will win an award package consisting of cash and gifts-in-kind.

The Immersion experience is free for the selected students. Tuition, room, board, admission fees and textbooks will be provided. To be considered for one of the 5 positions (plus 2 alternates) please contact Kay Molkentin at molkentinkf@hiram.edu. For more information, please visit www.hiram.edu/entrepreneurship.

Question of the Week—Win a gift card to Gionino’s!

Thanks to all those who participated in the Questions of the Week this year! Have a great 3-week, and a wonderful summer break. Congratulations to all the graduates!

The previous Question of the Week winner was Susanna Wong, who correctly identified Alcuin of York as the man credited with first using the question mark.

Congratulations Graduating E-Minors!

Ian Barton, Biology, Chemistry Minor
Timothy Isaac, Management
Karen Ising, Management
Gregory Karson, Management
Anthony Morgan, Computer Science
Randi Tabor, Management
Kentaro Toyonaga, Management

EVST & ENTR Joint Venture

Integrated Entrepreneurship has partnered with Environmental Studies to offer two new courses next year with the hopes that it will lead to the launch of a student run Home Energy Auditing business at Hiram. Interested students can take EVST280 – Sustainability Options at Home in the fall ’11 12-week to gain knowledge and hands-on experience related to improving sustainability and efficiency in residential homes. At the end of the course, students should be proficient in the Building Performance Index (BPI) fundamentals, capable of conducting a home energy audit, and ready to take the written and hands-on exam to become BPI Certified Building Analysts.

During the fall ’11 3-week, students from the EVST280 course as well as other students interested in starting up a business, are encouraged to take ENTR280 – Special Enterprise Development. This course will focus on the basic elements needed to start a student run home energy auditing service here at Hiram. The students will work together to develop the business plan for this exciting new venture.

Interested students can check out the courses descriptions online or contact Prof. Sarah Mabey (x5847) or Kay Molkentin (x5256) for more information.
