Hiram College educates future nurses to be compassionate caregivers who are clinically competent, ethically grounded and socially and culturally responsible.

Our Bachelor of Science in Nursing (B.S.N.) students receive a well-rounded education: They are educated with the knowledge and skills needed to be leaders in the provision of high-quality, effective nursing care.

Hiram College nursing students benefit from a 165-year liberal arts tradition that prepares them to think critically and to understand that knowledge is interrelated and interdisciplinary. They are educated to be critical observers of how the world works. They see issues, alternatives, solutions and aspects of life that are essential to those who are broadly educated. These skills, combined with the knowledge of the discipline of nursing, are essential to the preparation of those who serve as professional registered nurses.

The nursing program is approved by the Ohio Board of Nursing and accredited by the Commission on Collegiate Nursing Education (www.aacn.nche.edu/ccne-accreditation).

Hiram College’s Nursing Program offers:
- direct-entry program, with no separate application required
- small class sizes and personal attention
- advising with nursing faculty
- state-of-the-art facilities
- world-renowned clinical sites
- opportunity to minor in fields that enhance nursing, e.g., biomedical humanities, Spanish and psychology
- opportunities for campus and athletic involvement and international travel
- eligibility to apply for national registered nurse licensure exam (NCLEX) upon graduation

(over)
Hiram College educates students toward excellence in nursing. Our liberal arts curriculum integrates the arts, sciences and humanities with nursing to ensure Hiram nurses are skilled listeners and communicators, ethical decision-makers and compassionate caregivers.

Students receive expert instruction as they develop the knowledge, skills and behaviors needed to provide safe, effective and high-quality nursing care and to be leaders in nursing. Through clinical experiences in a variety of health care settings and simulated laboratory scenarios, students gain hands-on learning. Simultaneously, courses in ethics and the humanities contribute to development of a warm and caring bedside manner and comprehensive understanding of patient care.

Students participate in clinical experience in a broad range of areas that include primary, secondary and tertiary care.

Students gain experience in many areas of nursing that include adult, pediatric, parent-newborn, gerontology, community, critical care, psychiatric mental health and others.
